

## What can Maritronic do for You

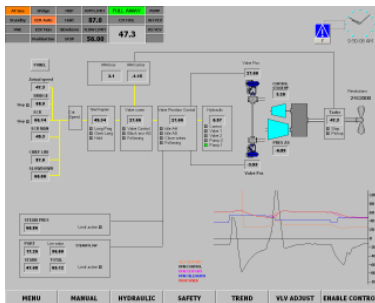

Maritronic is a company based in Bleiswijk, The Netherlands which is close to Rotterdam, and not to far from Amsterdam and Antwerp. The service is not limited to the Netherlands but Worldwide.

We can provide service for old type analog based control systems for Pitch control, Steam Turbine control, Main engine control (we have experience with the following main engines: Sulzer ZA, Sulzer ZAV, Sulzer RTA, SULZER RND, MAN KSZ.)

We have also experience with control systems for heavy lift cranes, Thyristor controlled DC motors up to 600Kw, AC motor control and Hydraulic Control. Basic we are specialized in old style control systems where the manufacturer does not support or does not exist anymore.

We are capable of delivering small control systems in a very short time based on siemens S7-300 or Omron PLC hardware.

The control systems are of cause not limited to these applications. We can also deliver the systems with Class approval.

We have delivered control systems for Steam Turbines, H / HH level tank measurement systems, Compressor control, Hydraulic valve control. The control systems are of cause not limited to these applications. We can also deliver the
